Installation manual of Mounting Pole

Here you can download TeltoCharge Mounting Pole installation manual, just press on the picture.

Installation tips:

During installation, it is required to drill holes in the foundation. It can be done in such ways:

- Pre-drilling according to the template attached bellow
- Marking spots for holes while stand itself is put in place

Mounting pole have a cavity in order to hide the input cable.

Please make sure, you are leaving enough space for input cable if it is preferred to lay it underground.

Size of cavity is shown in the drawing.

*Dimensions are shown in millimeters.
