Supported energy meters and all related technical data

In order to strive for wider applicability and compatibility, we constantly test and add new supported devices into list. All of the supported Energy meters are provided below.

In order to make **Dynamic load balancing** and **Solar** functionality work, please always check:

- if the **wiring** your Smart energy meter to TeltoCharge is right.
- if the **installer menu configuration** in mobile application according to your Smart energy meter is right.
